

The Pallet Network holds a barbeque

The Pallet Network (TPN) has announced a three-year deal worth €750,000 with Weber UK and Ireland, a leading supplier of gas, charcoal and electric barbeque grills and accessories.

The agreement will see Weber use TPN and their 24-strong member depots to ship, store and distribute to customers nationwide across Ireland, including leading DIY centres north and south. TPN has already invested in a custom designed warehouse management system which eradicates manual checking by scanning all movements of Weber products in and out of stock.

TPN's freight distribution service for palletised goods in Ireland operates through a network of 23 regional member hauliers, delivering and collecting pallets and carton freight throughout every county in Ireland on an overnight delivery service. TPN also offers a premium 48-hour export and import delivery service to and from the UK through its links with The Pallet Network UK.
