# The Pallet Network

## Logistics solutions for the world recession

Eliminating fixed costs wherever possible is always part of the actions needed to cope with a major market downturn. The more widespread and deeper the downturn, the more essential it becomes to shed fixed overheads where possible. Warehousing and nationwide deliveries usually suffers in two ways from reduced activity. The unit costs rise dramatically and the frequency of service to your clients is reduced.

Fortunately in this particular recession, there is a better solution that ever before.

The Pallet Network can provide:

**1.** A totally flexible warehousing and stock management facility with full pick and pack service managed on our virtual warehouse system which gives clients full visibility on all stock movements, order processing and delivery transits.

**2.** With a 21 depot nationwide delivery system TPN can provide the best and most cost effective daily delivery service to every village in Ireland at surprisingly low prices.

Because our warehousing facility is adjacent to our network HUB, we eliminate one of the expensive legs of a normal delivery operation- the collection from the client and the second handling of the cargo.

In addition to that our clients can enjoy the benefits of later daily cut off times for processing orders from their clients. We can provide impressive testimonials from several clients who already benefit from these facilities.

Why not talk to us about how we may be able to help you cope with the more challenging times we all face over the coming years.
